A Project Report

“Online Voting System”

Submitted To

Department of Computer Application

Bhairahawa Multiple campus

In partial fulfillment of the requirements for the Bachelor in Computer Application

Submitted By

Sushmita Thapa (Symbol No. 5202083)

Kusum Murau (Symbol No.5202074)

12 chaitra, 2082

Under the supervision of

Mr. Roshan Thapa

Tribhuvan University

Faculty of Humanities and Social Sciences

Bhairahawa Multiple Campus

Supervisor's Recommendation

I hereby recommend that this project prepared under my supervision by KUSUM MURAU AND SUSHMITA THAPA entitled “**Online Voting System**” in partial fulfillment of the requirements for the degree of Bachelor of Computer Application is recommended for the final evaluation.

LETTER OF APPROVAL

This is to certify that this project prepared by KUSUM MURAU AND SUSHMITA THAPA entitled “**online voting system**” in partial fulfillment of the requirements for the degree of Bachelor in Computer Application has been evaluated. In our opinion it is satisfactory in the scope and quality as project for the required degree.

Abstract

Voting is a fundamental way communities make decisions, yet traditional paper ballots are often slow, error-prone, and difficult to manage. With technology becoming part of everyday life, online voting systems provide a faster and more reliable alternative.

The main objective of online voting system is to allow voters cast their vote online electronically without the need for travelling to polling station. This is designed for small communities such as colleges, hostels, or clubs. The system includes User, Admin, and Database modules that together enable secure login, candidate management, vote casting, and accurate result generation.

Agile methodology is used which means the application was refined step by step to remain user-friendly while demonstrating practical concepts like authentication, modular design, and database connectivity. To ensure transparency and security, the system integrates blockchain-based authentication with SHA-256 password hashing during user registration.

The project successfully bridges the gap between traditional voting methods and modern digital platforms, offering both a practical tool for small-scale elections and a learning exercise in applying software engineering principles to real-world problems.

ACKNOWLEDGEMENT

We would like to thank all those who provided us guidance for the successful completion of this project.

First we would like to express our deepest gratitude to our supervisor, Mr. Roshan Thapa, for providing us with the right guidance and advice at the crucial situation and for showing us the right way. We are also deeply thankful to our co-ordinator, Mr. Sunil Kumar Shah, for helping us to choose appropriate project topic for this semester.

We would also want to extend our sincere thanks to internal examiner who helped us to improve our mistake and provided us more knowledge about the rules for the project.

We are also thankful to our campus who has provided us platform where we can utilize our technical skills and can have further knowledge to improve them and also thankful to all the teachers who taught since first semester which is the fundamental base of this project. On their guidance we came to successful completion of this project.

We also take this opportunity to express a deep sense of gratitude to our class teachers for proper suggestion and guidance. At last we would like to thank all the supportive friends and our family members who encouraged us throughout this journey.

TABLE OF CONTENTS

Chapter 1: Introduction.....	1
1.1 Introduction.....	1
1.2 Problem Statement.....	2
1.3 Objectives.....	2
1.4 Scope and Limitation.....	2
1.5 Development Methodology.....	3
1.6 Report Organization.....	4
Chapter 2: Background Study and Literature Review.....	6
2.1 Background Study.....	6
2.2 Literature Review.....	6
Chapter 3: System Analysis and Design.....	8
3.1 System Analysis.....	8
3.1.1 Requirement Analysis	8
3.1.2 Feasibility Analysis.....	10
3.1.3 Data Modeling (DFD).....	11
3.1.4 Process Modeling (DFD).....	12
3.2 System Design.....	13
3.2.1 Architectural Design.....	13
3.2.2 Data Schema Design	14
3.2.3 Interface Design	14
3.2.4. Physical DFD.....	16

3.3 Algorithm.....	16
Chapter 4: Implementation and Testing.....	18
4.1 Implementation.....	18
4.1.1 Tools used.....	18
4.1.2 Implementation Details of Modules.....	18
4.2 Testing case.....	19
4.2.1 Test cases for unit testing.....	19
4.2.2 Test cases for system testing.....	21
Chapter 5.Conclusion Future Recommendations.....	23
5.1 Conclusion.....	23
5.2 Lesson Learnt/Outcome.....	23
5.3 Future Recommendations.....	24
Appendices.....	25
References.....	56
